

STAY SAFE ONLINE:

TOP CYBERSECURITY TIPS

Use Strong, Unique Passwords

- Combination of Letters, Numbers and Symbols
- Avoid using the same password on different sites
- Change passwords regularly

Enable Two-factor Authentication

- Add an extra layer of security to accounts
- Use authentication applications or SMS codes

Keep Software Up-to-Date

- Regularly Update your OS, Browsers and Software
- Enable Auto-Update where possible

Be Wary of Phishing Scams

- Don't click suspicious links or attachments
- Verify the senders e-mail address
- Look for signs of fraudulent emails such as typos or urgent messages

Use a VPN

- Protect your privacy on public Wi-Fi
- Encrypt your internet connectivity

Secure Your Devices

- Use antivirus and anti-malware software
- Enable Firewalls
- Lock your devices with passwords, PINs, or biometric authentication

Backup Your Data

- Regularly backup important files
- Use both cloud and physical storage solutions

Be cautious on Social Media

- Limit the amount of personal information you share
- Adjust privacy settings to control who can see your posts

Educate yourself and others

- Stay informed about the latest Cybersecurity threads
- Share knowledge and tips with friends and family
